

**The rules of the OLC apply, with the following deviations:**

## **1. General**

Only completed triangular flights with a minimum flying distance of 300 kilometers will be accepted. The task has to be declared in the FR before take-off. The flight and the declaration have to be documented with an IGC approved FR approved for "all IGC badge flights and distance diploma" (i.e. only flights with a green V will be scored).

## **2. Triangular Course**

The acceptable triangular course must fulfil the FAI SC3 1.4.6 b i or SC3 1.4.6 b ii. If the acceptable triangular course does fulfil FAI Sporting Code SC3 1.4.6 b iii, a bonus of 30% (as per OLC-Classic) will be applied.

## **3. Winner**

Pilots may submit any number of flights meeting the criteria; only the highest scoring flight in any class will be counted in determining the winner.

## **4. Classes**

Winners are scored in the following classes: open, 18m, 15m, standard, club, double-seater and an overall class. The class is defined by the glider type used during each flight. A pilot may therefore attend in several classes.

## **5. National Laws and Regulations**

The flight has to be performed in accordance with national laws and regulations for gliders (in particular with regard to landing before sunset).
